NITIE, MUMBAI
&
POMS, USA

18th & 19th December 2015

Theme:

**“Innovations in manufacturing operations to
enhance firm performance”**

VENUE

National Institute of Industrial Engineering
Vihar Lake. Mumbai-400087

Practice Leaders Forum

A unique platform that brings the academicians and the practitioners together, the Practice Leaders Forum (PLF) is a rigorous approach envisaged by NITIE and POMS, to comprehend and analyze the challenges faced by practicing managers. The success of PLF is in its endeavor to foster collaboration between the various stakeholders from the industry and academics to achieve manufacturing excellence of firms by practicing innovation.

This PLF will have a special focus on the Small and Medium Enterprises (SMEs) engaged in the Manufacturing Sector.

1. Automobile / Automobile Components

Special focus - Product Quality and Productivity

2. Consumer Durables

Special focus - Supply Chain and Logistics Management

3. General / Heavy Engineering

Special focus - Operations Excellence and Manufacturing Management

4. Engineering Project and Construction

Special focus - Project Implementation Challenges

These four industrial sectors will host discussions and sharing of solutions by the industry practitioners and experts along with the academicians' inputs that drive operational excellence and manufacturing competitiveness.

Benefits of attending the PLF

PLF brings to a single place the experience and academic rigor required for the decision makers and executives in Manufacturing and Operations Management.

The NITIE POMS Practice Leaders are outstanding POM practitioners who are committed to share practical knowledge and insights with academia and industry.

They will explore and discuss emerging POM issues in the context of enhancing manufacturing competitiveness.

The aim of PLF is to find answers to issues confronted by manufacturing firms through collaborative, peer learning and sharing.

About NITIE

National Institute of Industrial Engineering (NITIE) is a pioneering academic institute of higher learning established in 1963. NITIE has been primarily covering man machine interface to enhance productivity and contribute towards the organizational development for private, public and government organizations. NITIE has travelled a long way in its endeavor to reach excellence in various aspects of Industrial Engineering. It has been providing solutions for problems in the areas like Industrial Engineering, Industrial Management, Environmental Management, Project Management and Manufacturing Management. Now in its 52nd year, NITIE's focused attention is to enable the growth in SMEs through Practice Leaders Forum that would share knowledge, innovation practices and expertise towards achieving manufacturing excellence.

About POMS

Production and Operations Management Society (POMS) is an international professional organization representing the interests of professionals from around the world. The main purpose of the POM Society is to promote the improvement of production and operations management and its teachings in public and private manufacturing and service organizations throughout the world. POMS is in its 27th year. It aims to disseminate its knowledge amongst the Indian firm managers through the Practice Leaders Forum.

This year the event is being held at NITIE on 18th and 19th December 2015 through the Practice Leaders Forum.
