JOB OPENING

BUSINESS ANALYTICS

TENURE/TENURE TRACK POSITIONS

Golden, Colorado

THE OPPORTUNITY

Colorado School of Mines (Mines) invites applications for a tenured/tenure-track faculty position in Business Analytics. The primary focus of this position is to help develop and support the quantitative business programs on campus. Candidates must have completed a PhD (or expect to complete their PhD by August 2021) in Business/Data Analytics, Management Science, Operations Research, Industrial Engineering, or a closely related data-analytics discipline. Business analytics and associated courses are taught in several programs at Mines, including the Engineering and Technology Management (ETM) MS degree program, the Data Science MS degree program, and the online Business Analytics certificate program. The ETM degree program, housed in the Division of Economics and Business, is one of the largest non-thesis MS programs on campus with a student body of between 50 and 60 students per year. Graduates of this program place great value on combining their technical undergraduate training with quantitative business skills and enjoy enhanced management opportunities in engineering and technology focused firms.

This position is a part of multiple tenured/tenure-track faculty positions in three clusters: (1) Computational Science and Data Analytics, (2) Advanced Manufacturing and Materials, and (3) Quantum Information, Electronic Materials and Devices. These cluster hires are an integral part of Mines’ strategic effort to grow in areas where we already have significant strengths or where our strengths are emerging. Mines is a great place to engage in education and research in each of these areas as they relate to our Earth, Energy and Environment mission. Mines is especially interested in qualified candidates who can contribute, through their research, teaching, and service, to the diversity and excellence of the academic community.
