

## **Operations Optimization Analyst**

Analyze Operational and Financial Workflows: Evaluate workflows and financial data using Power BI and Excel to identify inefficiencies, recommending strategies to increase productivity and reduce costs. Develop Financial Models and Metrics: Build financial models and performance dashboards leveraging advanced Excel and data visualization tools to monitor revenue streams, optimize cash flow, and inform growth strategies. Optimize Sales and Inventory Processes: Design data-driven inventory control systems using R Script to minimize waste and improve purchasing cycles, ensuring timely delivery of materials to meet production demands. Support Factory Expansion and Resource Allocation: Conduct detailed cost analyses and develop resource allocation plans to scale factory operations to increase production capacity. Deliver Strategic Growth Reports: Prepare data-driven reports from Salesforce translating complex data into actionable insights to support long-term business success and market expansion.

Minimum Requirements: Bachelors Degree in Finance, Business Administration or related field and 6 months of experience in Finance, Business Administration or related field.
