POMS Journal Biennial Awards

The POMS Board has approved the ten biennial awards listed below. The awards are listed in Alpha order of the names of the honoree so that it will be easy to remember which awards are in which year. The 10 awards delineate the vast domain of our discipline.

The Editor-in-Chief will appoint committees to select the winners. The Deputy Editor will assign papers published since 2018 to each award. Although the domain of each award is organized around journal departments, the Deputy Editor will also assign papers published in the special issues or published without identification with any department.

Awards to be given in the even number year (starting 2022)

- **John Buzacott Best Global Manufacturing Paper Award.** Best paper published by the Manufacturing Operations and the Global Operations Strategy departments in the preceding 4 years.
