The POMS Board has approved the 18 biennial awards listed below. The awards are listed in Alpha order of the names of the honorees so that it will be easy to remember which awards are in which year. The 18 awards delineate the vast domain of our discipline.

The Editor-in-Chief will appoint committees to select the winners. The Deputy Editor will assign papers published in the preceding 4 years to each award. Although the domain of each award is organized around journal departments, the Deputy Editor will also assign papers published in the special issues or published without identification with any department.

Awards to be Given in Even-Numbered Years (Starting 2026)
