

2026 POMS INTERNATIONAL CONFERENCE

Stockholm School of Economics, Sweden

23–25 JUNE 2026

TRANSFORMATION IN TIMES OF GEOPOLITICAL TENSIONS, SUSTAINABILITY CHALLENGES, AND DIGITALIZATION

ABOUT THE CONFERENCE

Stockholm is the largest urban area in the Nordic region and the cultural, political, and economic center of Sweden. Known as “The Venice of the North,” it is a leading hub for innovation and technology, the city of music, Nobel Prize celebrations, and top international universities (KTH, Karolinska Institute, Stockholm University, and the Stockholm School of Economics). Stockholm was the first European Green Capital and is among the cleanest cities in Europe, with a goal to become completely fossil-free by 2050. The city offers a rich concentration of historical sites and museums. During the conference, right after midsummer, Stockholm is at its most sought-after and welcoming time of the year, filled with free concerts and cultural activities.

The Stockholm School of Economics is the leading private business school among the Nordic Countries, a research powerhouse with strong connections to Swedish industry and entrepreneurship. Its most renowned scholars include economists Eli Heckscher and Bertil Ohlin (Heckscher- Ohlin Theory, Nobel Prize 1977). Among its alumni are prime ministers, ministers, and CEOs of major Swedish firms and unicorns. Its programs are highly ranked by the Financial Times, and the school is considered one of Europe’s top business schools. Located in the city center, the campus hosts one of Europe’s most successful incubators, fostering several unicorn startups (e.g., Klarna).

The 2026 POMS International Conference will take advantage of this unique setting. As geopolitical tensions reemerge, new challenges arise for our field in increasingly unstable times. Stockholm’s strong commitment to sustainability and digitalization provides an ideal environment to discuss the transformations firms must undertake to remain competitive amid geopolitical uncertainty.

THEMES

- Geopolitics & Supply Chains
- Behavioral Operations
- Disaster Management
- Disruptive Technologies and Operations Management
- Healthcare Operations Management
- Management of Technology
- Manufacturing Operations
- New Product Development, R&D, and Project Management
- Not-for-Profit Operations Management
- Service Operations Management
- Supply Chain Management
- Sustainable Operations & Transforming Supply Chains
